ABOUT ME

Personal Statement

With a passion for learning, the technology industry has so much to offer. I am always striving to learn the latest evolving technologies available. I thrive in challenges, problem solving and finding new ways to learn and do more. My goal is to do just that and more, as I believe in order to create those opportunities you need to learn everyday. My primary goal is to find an organisation where I will be challenged every day & to surrounded myself around experienced Developers whom I can learn from indefinitely.

PROJECTS

'Quiz-O-Mania' - Terminal Application
github.com/paveldemeter/quizomania

About
- I created a Terminal application "Quiz-O-Mania" which is a game. By Developing 'Quiz-O-Mania', I began to understand the fundamentals to programming, I met some challenges such as planning and time management.

Tech stack/ Dev Tools: Ruby, Trello, Github & VS Code

Pavel Demeter - Portfolio Website
paveldemeter.github.io/portfolio/index.html

About
- After being introduced to HTML, CSS , I Developed my first website which became my PortFolio. After creating my Terminal application and learning that time management is crucial, This was a very good Front-end experience.

Tech stack/ Dev Tools: HTML, CSS, Trello, Github, Heroku & VS Code

'SPLASH' Car Wash - deployed Web Application
github.com/paveldemeter/car_wash

About
- 'Splash' is designed to connect "Washers" that want to clean vehicles & "Owners" that want their vehicles cleaned. It is a simple idea that has always intrigued me. Developing this web application was challenging but very rewarding in experience, I began to understand various frame works & third party services. This application had given me the opportunity to taste the Back-end of programming and how users interact through the website.

Tech stack/ Dev Tools: Ruby, Rails, Heroku, PostgreSQL, HTML & VS Code

TECH STACK & DEV TOOLS

Ruby · HTML5 · CSS3 · Version Control (Github)

Agile Methodology(Trello) · JavaScript

PostgreSQL · Rails · SCSS

MERN JavaScript Stack · Heroku · VS Code
